

MXF WORKFLOW GUIDE

MXF Import

ImEx Suite

Welcome to Hamburg Pro Media's short MXF Guide.

This document should be regarded as an informal document providing an introduction to MXF for Final Cut Pro X. We assume that the user is familiar with the basic features and functions of FCP X.

The Guide is divided in two chapters 1.) MXF Import 2.) MXF Export

MXF WORKFLOW GUIDE

MXF Import**ImEx** Suite

MXF Workflow for FCP X

1.) MXF Import / ImEx Suite

To add or import MXF Media to your project go to the „File“ menu and click „Media“ or press „command - I“

MXF WORKFLOW GUIDE

MXF Import**ImEx** Suite

MXF Import

The Final Cut Pro X import window is coming up:

- choose a MXF file or a folder to import

alternatively:

drag & drop a MXF file into your FCP X event or the timeline.

MXF WORKFLOW GUIDE

MXF Import

MXF Import / ImEx Suite enables MXF support to Final Cut Pro X. It feels like you would work with QuickTime movie files. Open, view, play, edit without Transcoding.

ImEx Suite

MXF Export - ImEx Suite only

2.) Export. Either send the whole composition to Compressor or click on „File-Menu“ and choose „Share - Add Destination“.

By clicking on „Compressor Settings“, a new window appears. Open the „Custom“ Folder and choose the MXF4mac format you want to use. Click „Ok“

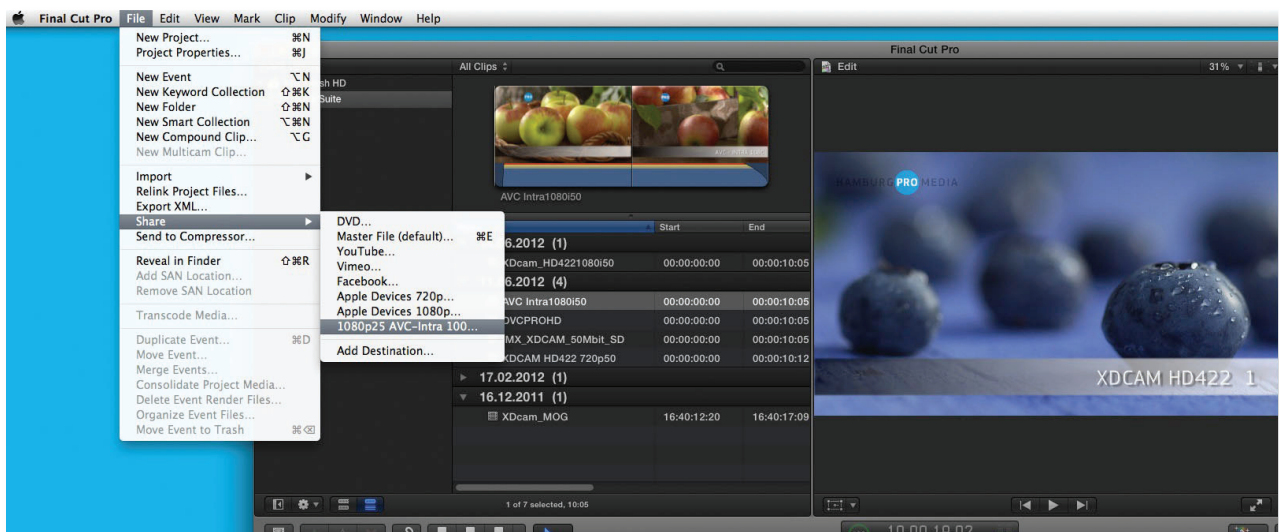

MXF WORKFLOW GUIDE

ImEx Suite

MXF Export - ImEx Suite only

This setting has now been added to the „Share“ submenu. To initiate the MXF export, click on this new menu item. In our example it is 1080p25 AVC-INTRA.

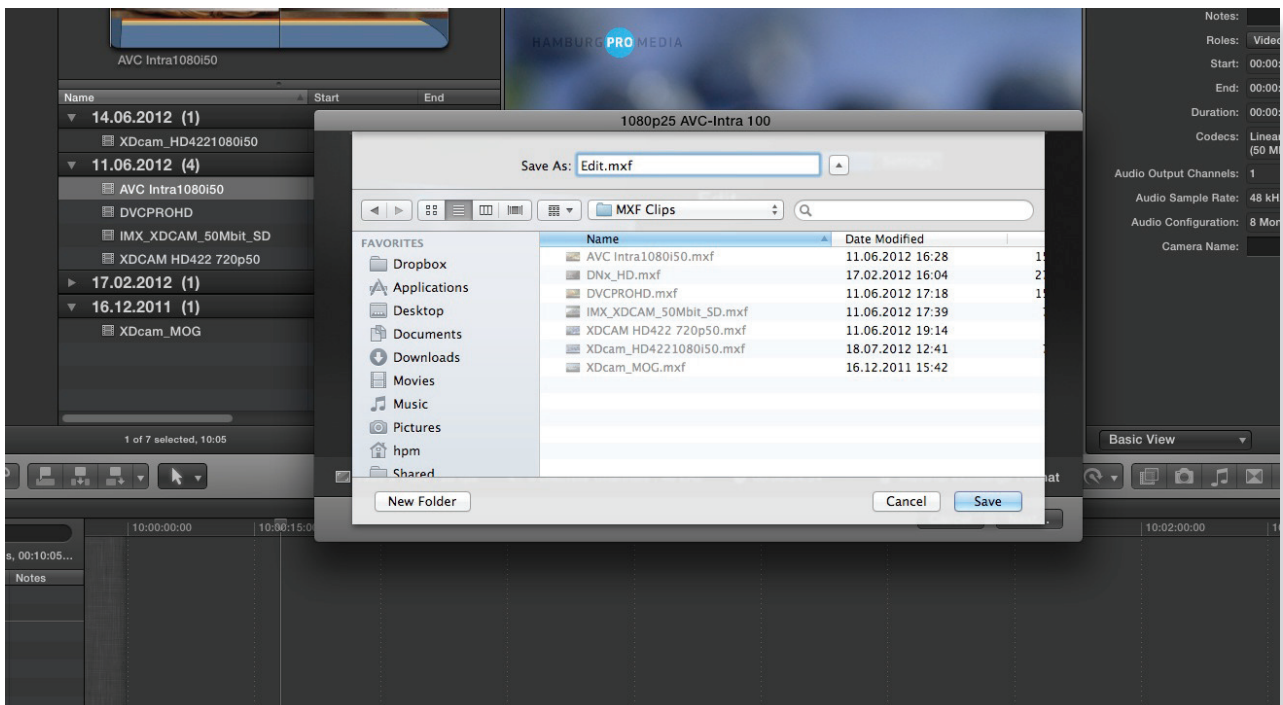

You will get a further window with the summary of the setting you want to use:

Press „Next“ to get into the „save as“ dialog.

MXF Export - ImEx Suite only

The last step is to choose path and name of the MXF file which is to be created. Please press „Save“ to start the export.

The Compressor runs as a background application while processing the export. Depending on the size of your file this may take a while.

If you have any further questions regarding MXF4mac, please send a mail to:
