

SCOPEBOX 2.0

A WHOLE NEW BOX OF TRICKS

- Simplify video monitoring, quality control, and capture with one low cost application
- Captures directly to QuickTime for immediate editing in Final Cut Pro, Avid and Adobe Premiere
- Monitor and Record multiple cameras simultaneously
- Replaces \$20,000 dollars of hardware

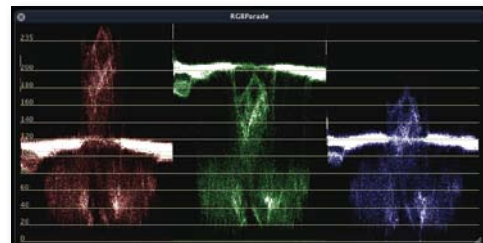

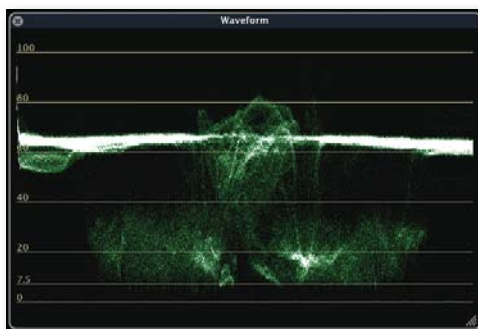

Across the industry, there is a dramatic change from single-use hardware devices to software-based solutions running on off-the-shelf personal computers.

Whether you're building a new color correction suite or looking for a way to ensure you get the shot in the field, ScopeBox offers everything you need.

ScopeBox is a Macintosh application that can replace all these tools:

- Preview Monitor
- Waveform
- Vectorscope
- Audio Meters
- Luminance Histogram
- RGB Histograms
- RGB and YUV Parades
- Direct to Disk Recorder

Symbiosis EU are an appointed distributor for the ScopeBox 2.0 HD and SD products from Divergent Media.

SCOPEBOX 2.0

A WHOLE NEW BOX OF TRICKS

Customizable

Each of ScopeBox's tools can be positioned, resized and customized to meet your specific needs. Layouts can be saved and recalled at a later time.

ScopeBox doesn't sacrifice quality either. Each palette shows you all of your pixels and every scan line – no sampling or scaling is applied.

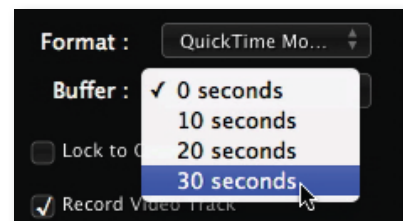

Support for All Major Formats

ScopeBox 2.0 supports monitoring all these formats:

- DV, DVCam, DVCProHD, HDV
- IIDC and USB
- SDI, HD-SDI, and analog capture cards
- Telestream's Pipeline network encoder
- Any QuickTime compatible file

Record to QuickTime, DV, m2t

The recorder in ScopeBox saves you time and frustration by recording your video to hard disk in a format that can be imported directly into your non-linear editing software. No more logging and capturing, no more converting files from obscure formats, and no worrying about tape dropouts.

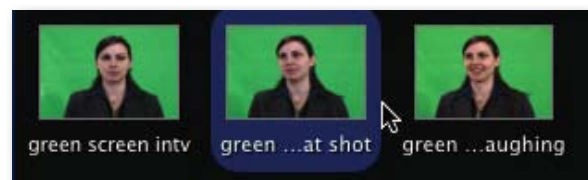

Buffered Record

ScopeBox keeps a constant buffer of video so that you never miss a moment. Just enable buffered record and ScopeBox constantly records up to 30 seconds in memory, so even if you miss the perfect shot you can be sure ScopeBox didn't.

Clip Review

The clip list allows you to review shots from within ScopeBox, change clip names, and quickly open and play back previous shots.
