

# ShotPut Pro™ for Windows

Automated Offloading for Digital Media  
From Imagine Products Inc.

## Offload Any Media Card

Canon EOS	RED
Compact Flash	JVC ProHD
Panasonic P2	Sony SxS
Alexa	XDCAM HD/EX

Verify file-by-file sizes, MD5 or CRC checksums, ensure of your media copies exactly match the originals with file verification.

Drop any file any time onto the Checksum Generator to verify the CRC or MD5. Use it to ensure file integrity of Post-Production processing and any copied files at any time!

Any Media

ShotPut Pro™

Any Media

Automatically add your contact information to each offload report.

ShotPut Pro can also prompt you to type in the Card ID or identifier.

You can even insert personal notes into a log, such as contact or project information.

### Additional Information

- Add card identifier to log after each offload
- Add notes to log
- Append destination folder name to logs that are saved

Testing Additional Information

ShotPut Pro will auto-offload removable volumes (drives or cards) upon insertion streamlining your workflow. Just setup an automated naming convention and select Automatic mode.

If volumes are already mounted, use the Manual option to select the entire card or drive for copying. You can also Drag and Drop any folder containing files into the queue at any time.

## Why Use ShotPut Pro?

**ShotPut Pro** for Windows is an automated copy utility application for HD video and photo files (Canon, Panasonic, RED, Sony, etc.). It makes secure, auto-named copies of a card's contents, entire hard disks or selected files to multiple locations simultaneously. All copies are verified.

**HD Digital Video Media:** ShotPut Pro offloads ANY media type including P2, AVCHD, JVC HCSD, MxR, SxS, RED and others.

**Digital Still Media:** ShotPut Pro even offloads still image files from HCSD cards including RAW, JPEG, TIFF and others.

**Entire Cards or Disks:** The contents of any mountable volume (card or drive) can be copied.

**Copy Folders or Files:** Individually select just the material you want to backup and verify. Drag and Drop the list to process.

**Fast Copying:** ShotPut Pro reads the source files once, and uses multi-thread technology to copy multiple files to multiple destinations simultaneously for the fastest possible offloading.

**Security:** Verify file-by-file sizes, or byte-to-byte comparisons of your media copies to ensure they exactly match the originals with MD5 or CRC checksums. The checksum calculator will calculate the checksum of any file at any time to compare two files for file integrity of Post-Production processing.

**Verification Report:** Create a printable record of file transfer activity, how the copies were named, time, date, etc. Save complete details for project organization or just summaries for billable time with text, XML, CSV, and HTML.

**Personalized logs:** Add personalized info to each offload report, Card ID, identifier, or personal notes.

**Automatic Process:** Setup an auto-naming scheme and use the auto-offload mode to begin copying cards upon insertion.

**E-mail Me:** Automatically receive an e-mail notification after offloading finishes!

**Manual Process:** Select from a list of removable drives, or Drag and Drop individual files or folders into the processing window.

**Easy Folder Naming:** Improve consistency and organization by letting ShotPut Pro auto-name copy folders. Select from various custom naming conventions such as card name, time/date information, project name with auto-numbering, etc.

**Reformat Cards:** After offloading is finished, let ShotPut Pro automatically erase the card so it's ready to return to the camera. At any time known card types can be erased and reformatted for any camera.

**Error Checking:** Eliminates human errors. Prevents accidental overwriting of existing folders. Problematic files are automatically skipped and then retried or canceled later.

## ShotPutPro at a Glance

ShotPut Pro is the industry's de-facto standard offloading application for professionals. Its simple user interface and robust copy speeds make it indispensable for today's tapeless HD workflows.

Whether you're copying just one card or five at a time, to one or more portable hard disks at a time, with ShotPut Pro you can 'Offload with Confidence'. Minimize your data wrangling time; maximize your creative time.

## File Verification

Video and photo files are highly valued. For that reason, ShotPut Pro includes file verification to ensure your media is properly copied before the card containing original material is erased.

ShotPut Pro offers several verification methods including: MD5, CRC, and SHA.

## Automatic or Manual

ShotPut Pro will auto-offload removable volumes (drives or cards) upon insertion streamlining your workflow. Just setup an automated naming conventions and select Automatic mode.

If volumes are already mounted, use the Manual option to select the entire card or drive for copying. You can also Drag and Drop any files or folders into the queue at any time.

Just want to backup video from the morning's shoot while you break for lunch? Or maybe you just want to clone and verify certain folders of clips from a portable hard disk returning from the field? Drag and drop them into the queue and let ShotPut Pro do the rest.
